WOHA: Breathing Architecture Forum

Explore innovative green architecture that captures the 'spirit of place'

WOHA explores architectural strategies in response to contemporary issues of urbanisation, density, sustainability and climate, with a particular focus on Asia and the tropics. Working on diverse projects ranging from small houses to large skyscrapers, from train stations to schools, WOHA's projects are linked by a desire to provide everyday delight to the end user and to connect with the local community. "Breathing Architecture" presents a wide range of built and speculative projects - from a single storey resort in Bali to a 60-storey housing project for 20,000 people in Mumbai, to a speculative city of 5 Million on just 45 square kilometres - linked by these themes.

Following the lecture, **Natasha Cica** of the Inglis Clark Centre will lead a discussion with:

- **Richard Hassell**, WOHA
- **Mun Summ Wong**, WOHA
- **Ryk Goddard**, Breakfast Presenter, 936 ABC Hobart
- **Stephen Loo**, Professor of Architecture, UTAS

Date & Time: Thursday 2nd May, 6.00pm

Venue: Dechaineux Theatre, Tasmanian Art School, Hunter Street, Hobart

Register: Email to UTAS.Events@utas.edu.au or phone 6226 2521
